1992 Subscription data. All prices are **inclusive** of postage and handling. The Dutch Guilder price is definitive, the currency equivalent is for guidance only.
Physica A: The subscription price per volume is Dfl. 371.00 ($184.00). 10 volumes have been announced at a total price of Dfl. 3710.00 ($1837.00). Physica A is published semimonthly.
Physica B: The subscription price per volume is Dfl. 371.00 ($184.00). 8 volumes have been announced at a total price of Dfl. 2968.00 ($1469.00). Physica B is published monthly.
Physica C: The subscription price per volume is Dfl. 371.00 ($184.00). 17 volumes have been announced at a total price of Dfl. 6307.00 ($3122.00). Physica C is published semimonthly.
Physica D: The subscription price per volume is Dfl. 371.00 ($184.00). 8 volumes have been announced at a total price of Dfl. 2968.00 ($1469.00) Physica D is published monthly.
Physica A, Physica B, Physica C and Physica D: The total price of a combined subscription (43 volumes in all) is Dfl. 12943.00 ($6407.00). Please contact the Publisher for special rates for other combinations of Physica sections.

Subscriptions should be sent to the Publisher, Elsevier Science Publishers B.V., Journals Department, P.O. Box 211, 1000 AE Amsterdam, The Netherlands, or to any subscription agent.
Journals are sent by surface delivery to all countries, except the following countries where SAL air delivery (Surface Airlifted Mail) is ensured: USA, Canada, Japan, Australia, New Zealand, The People's Republic of China, Israel, India, Brazil, Malaysia, Singapore, South Korea, Taiwan, Pakistan, Hong Kong, South Africa. Air mail rates for other countries are available upon request. Claims for missing issues should be made within three months of their publication. The Publisher expects to supply missing issues free only if losses have been sustained in transit and when stocks permit.

Elsevier Science Publishers B.V. All rights reserved. No part of this publication may be reproduced, stored in a retrieval system or transmitted in any form or by any means, electronic, mechanical, photocopying, recording or otherwise, without the written permission of the Publisher, Elsevier Science Publishers B.V., Copyright & Permissions Department, P.O. Box 521, 1000 AM Amsterdam, The Netherlands.

Special regulations for authors. Upon acceptance of an article by the journal, the author(s) will be asked to transfer copyright of the article to the Publisher. This transfer will ensure the widest possible dissemination of information.

Submission to this journal of a paper entails the author's irrevocable and exclusive authorization of the Publisher to collect any sums or consideration for copying or reproduction payable by third parties (as mentioned in article 17 paragraph 2 of the Dutch Copyright Act of 1912 and in the Royal Decree of June 20, 1974 (S. 351) pursuant to article 16b of the Dutch Copyright Act of 1912) and/or to act in or out of Court in connection therewith.

Special regulations for readers in the USA. This journal has been registered with the Copyright Clearance Center, Inc. Consent is given for copying of articles for personal or integral use, or for the personal use of specific clients. This consent is given on the condition that the copier pays through the Center the per-copy fee stated in the code on the first page of each article for copying beyond that permitted by Sections 107 or 108 of the US Copyright Law. The appropriate fee should be forwarded with a copy of the first page of the article to the Copyright Clearance Center, Inc., 27 Congress Street, Salem, MA 01970, USA. If no code appears in an article, the author has not given broad consent to copy and permission to copy must be obtained directly from the author. All articles published prior to 1981 may be copied for a per-copy fee of US $2.25, also payable through the Center. (0.8.B. For review journals this fee is $0.25 per copy page.) This consent does not extend to other kinds of copying, such as for general distribution, resale, advertising and promoting purposes, or for creating new collective works. Special written permission must be obtained from the Publisher for such copying.

No responsibility is assumed by the Publisher for any injury and/or damage to persons or property as a matter of products liability, negligence or otherwise, or from any use or operation of any methods, products, instructions or ideas contained in the material herein.

Note to authors

Physica is published in four sections:

Physica A (*Statistical and theoretical physics*) contains papers in all fields of statistical physics as well as on general theoretical physics subjects. The emphasis of the journal is on fostering the interaction between experimental, theoretical and computational research in statistical physics. The field of statistical physics is meant to comprise any phenomena where the relationship between microscopic properties and macroscopic behaviour plays a role.

Physica B (*Condensed matter*) contains papers and review articles in the realm of physics of condensed matter. Both experimental and theoretical contributions are invited, although theoretical papers should preferably be related to experimental results.

Physica C (*Superconductivity*) serves as a rapid channel for publications on superconductivity and related subjects. This includes theoretical papers on the fundamental issues raised by high-T_c superconductivity, reports on measurements of a wide variety of physical properties of high-T_c superconductors, on new materials and new preparation techniques, on thin-firm and device-oriented work and on theoretical results pertinent to such experiments. New results in the traditional areas of superconductivity as well as on novel phenomena (e.g. heavy-fermion superconductivity) will also be included.

Physica D (*Nonlinear phenomena*) contains papers and review articles reporting experiments, techniques and ideas which, although they may be derived and explained in the context of a particular field, advance the understanding of nonlinear phenomena in general. Contributions of this type in the recent literature have dealt with: wave motion in physical, chemical and biological systems; chaotic motion in models relevant to turbulence; quantum and statistical mechanics governed by nonlinear field equations; instability, bifurcation, pattern formation and cooperative phenomena.

Instructions to authors for Physica D (short version)

Submission. Manuscripts should be sent in *triplicate* to one of the editors (addresses given on the inside front cover page).

Submission of a paper will be taken to imply that it represents original work not previously published, that it is not being considered elsewhere for publication, and that if accepted for publication it will not be published elsewhere in the same form, in any language without the consent of the publisher.

The master copy and original drawings will be returned to the authors in case their paper is not accepted for publication.

Proposals for review articles (approximately 500–1000 words) should be sent to any one of the editors. The editors will evaluate each proposal on the basis of 1) subject matter and 2) presentation and readability.

Manuscripts should be written in English and typed with double spacing, wide margins and on one side of the page only.

The *title* should be concise and specific. When the length of the title exceeds 45 letters, a *running* title should be indicated. The name of the institute where the research was carried out should be stated with each author's name.

An *abstract* of not more than 150 words should be provided in English, summarizing the new information and the author's conclusions.

Keywords (five or less) should be provided for the subject index, and, if possible, the appropriate PACS classification codes.

References in the text should be numbered (e.g., "Jones and Smith [1] have reported that ...") in ascending order, and listed on a separate sheet stating the author, journal, volume and the year of publication (in brackets) and the number of the first page. Example: [1] S. Jones and P. Smith, Phys. Rev. 190 (1964) 2016.

Formulae should be clearly written. Vectors will be printed in bold-face italics (heavy, slanting type), and should be indicated by a wavy underlining in the type-script.

Special attention should be paid to characters that can be easily misread, such as i (lower case), I (cap.), l (el), 1 (one), ′ (prime); o (lower case), O (cap.), 0 (zero), ° (degree); u, v (vee), ν (Greek nu), V (cap.); $\times$, x, X; z, Z; p, P, ρ (Greek rho); etc.

Drawings and any *lettering* should be done in India ink, or by means of a high-quality printing device. Lines should be bold, the frame lines of graphs slightly finer than those of the plotted curves. The figures should be numbered and the captions listed on a separate sheet.

For *colour illustrations*, see Physica D, Volume 53, No. 1 (1991) p. v, or contact the editors.

Alterations in the text cannot be permitted once the paper has been typeset. Authors may be charged for extra corrections resulting from their inattention.

Refereeing. All papers are subjected to refereeing, and in case a paper cannot be accepted in the form it was submitted, the submitting author will be informed about the referee's comments.

Acceptance. Acceptance forms will be sent by the editor. There is *no* page charge. Upon acceptance of an article by the journal, the author(s) will be asked to transfer copyright of the article to the publisher. This transfer will ensure the widest possible dissemination of information.

Reprints. 50 reprints of each article will be supplied to the first author free of charge (in case of an article with colour illustrations this amounts to 200 reprints free of charge). An order form for reprints will be provided with the author's proof. It should be returned to the publishers together with the corrected author's proof.

Now available from Elsevier Science Publishers as from Volume 8 onwards:

JOURNAL OF GEOMETRY AND PHYSICS

Executive Editor:
M. Modugno,
University of Florence, Florence, Italy

Editorial Board:
A. Lichnerowicz, *Paris, France* (Chairman)
O. Alvarez, *Berkeley, CA, U.S.A.*
V.I. Arnold, *Moscow, U.S.S.R.*
M.F. Atiyah, *Cambridge, U.K.*
S. Benenti, *Turin, Italy*
M. Cahen, *Brussels, Belgium*
Y. Choquet-Bruhat, *Paris, France*
D. Christodoulou, *Syracuse, U.S.A.*
R. Debever, *Brussels, Belgium*
S. Deser, *Waltham, MA, U.S.A.*
C.T.J. Dodson, *Toronto, Canada*
L.D. Faddeev, *Leningrad, U.S.S.R.*

A.M. Vinogradov, *Moscow, U.S.S.R.*
T.J. Willmore, *Durham, U.K.*

The Journal of Geometry and Physics is an International Journal in Mathematical Physics. The Journal stimulates the interaction between geometry and physics by publishing primary research-, discussion- and review articles which are of common interest to scientists in both fields.

The Journal covers the following areas of research:

Methods of:
- Lie groups and Lie algebras and their representations
- Quantum groups and their representations
- Algebraic geometry
- Differential topology
- Real and complex differential geometry
- Geometrical approaches to dynamical systems and partial differential equations
- Global analysis
- Non-commutative differential geometry

Applications to:
- Classical mechanics of systems of finite and infinite degrees of freedom
- Quantum mechanics, especially geometrical schemes of quantization
- Classical and quantum field theory
- Quantum fields on curved space-time
- Classical and quantum gravity
- Strings and superstrings

Forthcoming Papers:
C. Ferrario and A. Passerini: Dynamical symmetries in constrained systems: a Lagrangian analysis • *D. Gurevich, V. Rubstov and N. Zobin:* Quantization of Poisson pairs: the *R*-matrix approach • *G.W Patrick:* Relative equilibria in Hamiltonian systems: The dynamic interpretation of nonlinear stability on a reduced phase space • *J. Grabowski:* Abstract Jacobi and Poisson structures: Quantization and star-products • *A. Cabras and A.M. Vinogradov:* Extensions of the Poisson bracket to differential forms and multi-vector fields • *B.A. Khesin* : Ergodic interpretation of integral hydrodynamic invariants • *J. Kijowski and G. Magli:* Relativistic elastomechanics as a Lagrangian field theory.
